

8 April 2024

To whom it may concern:

I am writing this recommendation for Tanishq Kothari, a graduate of the Master of Science in Cybersecurity Engineering program at USC. Tanishq served as a Teaching Assistant for my course on Security Systems during the fall semester of 2023. As a student in my class in 2022, and as a teaching assistant in 2023, Tanishq demonstrated significant proficiency in both theoretical and practical aspects of cybersecurity. He has the ability to discuss cybersecurity issues, assess a wide range of security systems, and he was very effective in assisting the student in our class to develop a clearer understanding of the course material. His technical skills and communication skills, combined with his keen interest in the ethical considerations of computer security, will make Tanishq an invaluable asset to any organization. I am confident that Tanishq will do well in the corporate world and contribute significantly to the field of cybersecurity.

Sincerely,

Prof. Clifford Neuman
Director, USC Center for Computer Systems Security
Associate Director, USC Data Science Program
Associate Professor of Computer Science Practice
Thomas Lord Department of Computer Science
Viterbi School of Engineering
University of Southern California
